

SwimDay Simplified - App Goals and Differentiators

OVERALL VISION

A parent-friendly web and mobile app that makes swim meets less stressful and more predictable. Focuses on timeline clarity, multi-swimmer organization, and crowd-sourced progress without relying on live data feeds or official timing systems.

WHAT EXISTING APPS DO

Meet Mobile: Live results, official times but no timeline forecasting or family view.

SwimTopia / OnDeck: Team management tools but not personalized for multi-swimmer families.

SwimminglyFan: Simplified live scoring but still depends on official meet data.

SWIMDAY SIMPLIFIED - UNIQUE FEATURES

- Family Timeline View: Combines multiple swimmers into one chronological timeline.
 - Offline Functionality: Works using only a PDF heat sheet, no live data required.
 - Crowd Assist: Parents share current event/heat progress in real time.
 - Smart Notifications: Reminders 15 minutes before events; adjusts with updates.
 - Multi-Swimmer Scheduling: Select multiple swimmers, download combined PDF.
 - Time Estimation Engine: Estimates heat/event durations using seed times + intervals.
 - Admin Pre-Upload (Planned): Admins pre-upload heat sheets for all verified users.
 - Persistent Data: Saves heat sheet and timeline locally between sessions.
 - Optional Crowd Updates: Users choose whether to accept shared updates.
-

DESIGN PHILOSOPHY

Predict, not report: Help families plan before events happen.

Assist, not overwhelm: Simple, mobile-friendly design.

Community, not data feed: Human collaboration replaces live systems.

Scalable: Free tier (1 swimmer) to Pro tier (multi-swimmer + timeline tools).

STRATEGIC ADVANTAGE

SwimDay Simplified fills the gap between live result apps and team management platforms. It empowers parents to understand and plan meets even when official data is unavailable.
